Ampermanager

Ampermanager

Amper Soft & DOS Manager

Ampermanager enhances the BASIC programming language on the Apple II by interfacing machine language routines directly to Applesoft with the ampersand (&) command. Three additional utilities will help you write EXEC files, launch commands from menus, and read or write disk blocks in ProDOS, and any Track/Sector pair in DOS 3.3.

Rick Sutcliffe

Produced by
Brian Wisler & Bill Martens

Over 70 Features Include:

- Shorthand for often-used Applesoft screen handling commands.
- Turning on and off lowercase input with simple commands.
- Enhanced INPUT facility and PRINT formatting, often referred to as PRINT USING.
- Better direct interface with the Apple's memory and DOS, including reading and writing specified track/sector locations on a disk.
- Enhanced string manipulation routines.
- Management of user-written machine language subroutines.
